**L02 — Answers for post-lab questions — Chris Cherniakov.**

1) The elements of T would be {2, 3, 0}
2) Power set of an empty set contains an empty set, so P(∅) would contain {∅}.
3) It would be {{}, {b}. {c}, {b, c}}. P(A – {A}) would be a subset of P(A).
4) Ps := Pt ∪ {x}.
